ABSTRACT

After working for a few decades, gas-discharge-visualization (GDV) device, alternatively called electro-photonic-imaging (EPI) device, was innovatively developed by Prof. K.G. Korotkov in 1995. The sophisticated GDV diagnostic device additionally is being used as an important tool for generating comprehensive-digital-medicine by feeding an electromagnetic signal from the GDV device to the comprehensive-digital-medicine preparation device, involving very low cost. This medicine helps to achieve near zero disease-levels in the various organs as well as the immune, endocrine and nervous systems of all health-conscious persons, who want to continue sincerely with the optimal combination of the preventive medicines of digital-homeopathy and evolved-homeopathy, and occasional GDV (once in a month) check-up. When this condition is achieved, about 20 years age-reduction is felt along with improvement of physical and mental stamina and increment in longevity. To begin with, the global organizations and insurance companies will have to provide for the first few years fund and offer suitable incentives (may be, appropriate annual cash-incentives after remaining under coverage of comprehensive-digital-medicine prevention scheme), since vast majority of the apparently healthy part of humankind believe that they're healthy, although all of their organs are having imperceptible disease level between 0.8 to 1.0, and such disease level in immune system (including Spleen) cannot prevent tumors/cancer and many other severe diseases. After a span of few years, global GDP can increase by 5% over a year (in contrast with the present 3%), when this increased GDP (due to better health and increase in retirement age) can fund such schemes.

Keywords: GDV/EPI device, Digital medicine, Health promotion, Preventive medicine, Digital homeopathy, Comprehensive digital medicine, Stress-related disorders, Evolved homeopathy

INTRODUCTION

As explained in our two previously published papers, health promotion methodology of comprehensive digital medicine or digital homeopathy is very useful to achieve near zero disease-levels in various organs and immune, endocrine and nervous systems of a person's body, but only for those persons, who are health-conscious and want to continue sincerely with the preventive methodology of

comprehensive digital medicine or digital homeopathy, with occasional gas-discharge-visualization (GDV) check-up, as may be necessary.^{1,2} Normally, any typical healthy person will not start undergoing health-promotion, because they usually consider themselves sick only after perceiving symptom(s). As explained below, true "nipping in the bud" of any disease from a patient's body is possible only when the treatment starts based not on a patient's perception of symptom(s), but on a whole-body diagnostic

chart generated by a sophisticated device like the GDV diagnostic system.

As explained in a previously published paper, persons whose disease level of immune system has not been brought down and maintained at near-zero values (as is done while doing health-promotion using comprehensive digital medicine or digital homeopathy medicine) have partly-diseased immune system (including spleen).^{2,3} Hence, cancer cells are able to hide from, or trick the immune system into helping cancer cells stay alive and grow.⁴ Hence, to eliminate the possibility of diseases including the growth of tumor and cancer cells, concerned persons need to do health-promotion using comprehensive digital medicine or digital homeopathy medicine, and periodical GDV check-up to ensure that their organs, as well as immune (including spleen), endocrine, and nervous system are always remaining at near-zero values.

This paper presents ways to prevent and cure problems of various organs and systems using health promotion methodology utilizing an optimal combination (as explained below) of the side-effect free preventive and curative medicines of comprehensive digital medicine or digital homeopathy and evolved homeopathy, which is very useful to achieve and maintain near zero disease-levels in the various organs and systems of all persons; but, they need to continue sincerely with the preventive medicines of comprehensive digital medicine or digital homeopathy and evolved homeopathy, and occasional GDV check-up (once in a month); this will help them prevent occurrence of tumor and cancer, in their bodies. As mentioned in a previously published paper, evolved homeopathy is based on three fundamental-principles of cure: nipping in the bud, prevention is better than cure, and identification of the exciting or primary cause for acute diseases, for achieving rapid cure and future prevention.⁵

In a previously published paper, it has been described how the preventive methodology of evolved homeopathy can be used by any human being to maintain her /his heart, cardiovascular system and coronary vessels at near zero disease-levels.⁶ By following the three fundamental-principles of cure mentioned above, it is possible to prevent and even cure angina in the initial stage; and, by then whatever little dead tissue forms in the myocardia and its associated muscles, those can be eliminated by using a evolved homeopathy medicine as and when required. Also, to avoid recurrence of further angina attack, preventive medicines need to be taken as and when required, to eliminate the effect of any exciting or primary cause.

METHODS

GDV whole-body diagnostic system

After working for a few decades, Prof. Korotkov of St. Petersburg National Research University of Informational Technologies, Mechanics and Optics (ITMO) in Russia,

developed this low-cost (only a few thousand Euros, which will fall further when produced on a mass scale), sophisticated diagnostic device, utilizing the GDV technique or the electro-photonic imaging (EPI) technique, based on the Kirlian effect, in 1995. This device registers and analyzes the electro-photonic emissions of human fingers, by applying a weak electrical current to each of the fingertips for less than a millisecond; the electronic "glow" of this discharge, is captured by the scanner/camera system and then analyzed based on concepts of acupuncture (of traditional Chinese medicine (TCM)), and utilization of advanced mathematical techniques. The resulting chart reports the health conditions of each of about thirty organs/glands/systems (including the immune, endocrine and nervous systems) of human body, within a scale range of 0 to 3. Analysis of these data reveals that a person's perception of symptom(s) usually starts at a disease level from 1 to 1.5, whereas the detection of diseased condition, by the corresponding diagnostic devices of allopathy (conventional medicine) usually starts at a disease level near 1.5 to 2. The GDV device is being used as an important tool for achieving near zero disease-levels in the various organs and systems of human body, that leads to health promotion.

Comprehensive digital medicine or digital homeopathy medicine is generated by supplying an electromagnetic signal from the GDV device to the comprehensive digital medicine or digital homeopathy medicine preparation device, involving very low cost.¹

Evolved-homeopathy and COVID-19 era

The need for evolved homeopathy (which is an evolved version of "advanced-homeopathy", as explained below) has arisen during the COVID era, as it has been observed that many diseases are stress-related disorders, and this is true for more diseases and for larger section of patients (including even children and teenagers).

It has been found that potencies lower than those specified in advanced-homeopathy (which can be called 'specific homeopathy') developed over a few generations by Banerji et al of Prasanta Banerji Homeopathic Research Foundation (PBHRF), Calcutta, are sometimes more useful to avoid medicinal aggravation based on the basic homeopathic principle: "similia similibus curentur".⁷

Health promotion methodology presented here is an optimal combination (as explained below) of comprehensive digital medicine or digital homeopathy and evolved homeopathy medicines, which are very useful for any person to maintain a person's organs as well as the immune, endocrine and nervous systems at near zero disease-levels, based on the occasional checking (once a month) using the GDV whole-body diagnostic system, when simultaneously the comprehensive digital medicine or digital homeopathy medicine for that person is generated.

Prevention is better than cure

The following six evolved homeopathy medicines may be taken daily (once for persons having tension-ridden lifestyles, and twice for persons having excessive tension-ridden lifestyles) for prevention of liver, stomach, lungs and heart problems, as mentioned with references in our previously published papers and other sources.^{6-8,9-17} These include: Cactus Gr. 2x; Crataegus Oxy. 2x (a heart tonic); Cocculus Ind. 2x; Colocynthis 2x; Chelidonium Majus 2x; and Ipecacuanha 2x. It is important to mention that doses of these medicines should always be taken, keeping 20 minutes gap (from any consumption of food or drinks), before and after the medicine doses.

Nipping in the bud

For most of the people, monthly generation of comprehensive digital medicine or digital homeopathy medicine, and its regular consumption will be enough to keep all their organs and systems at near zero disease-levels. But, for those who are having tension-ridden (particularly, anxiety, irritability and anger) lifestyles the regular dosage of the few medicines mentioned in the previous section (2.3) will prevent by nipping in the bud, the ailments of liver, stomach, lungs, heart, coronary vessels, cardiovascular system, of concerned people, with a purpose to achieve and maintain near zero disease-level till the next monthly session of GDV diagnostic check-up.

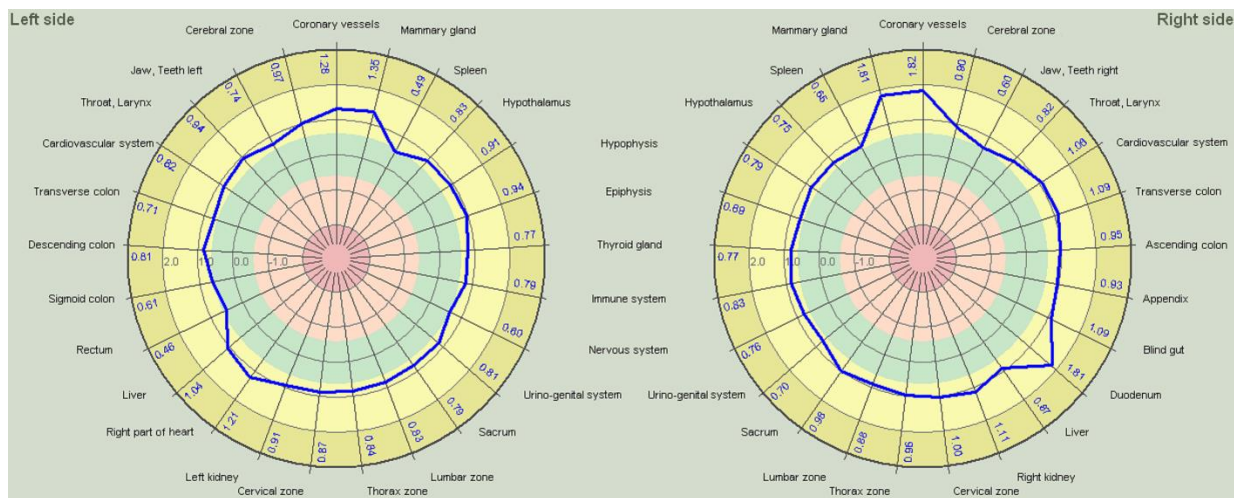

Figure 1: Initial diagnostic chart of AB (a typical healthy person), before he started undergoing health-promotion using comprehensive digital medicine or “digital homeopathy”.

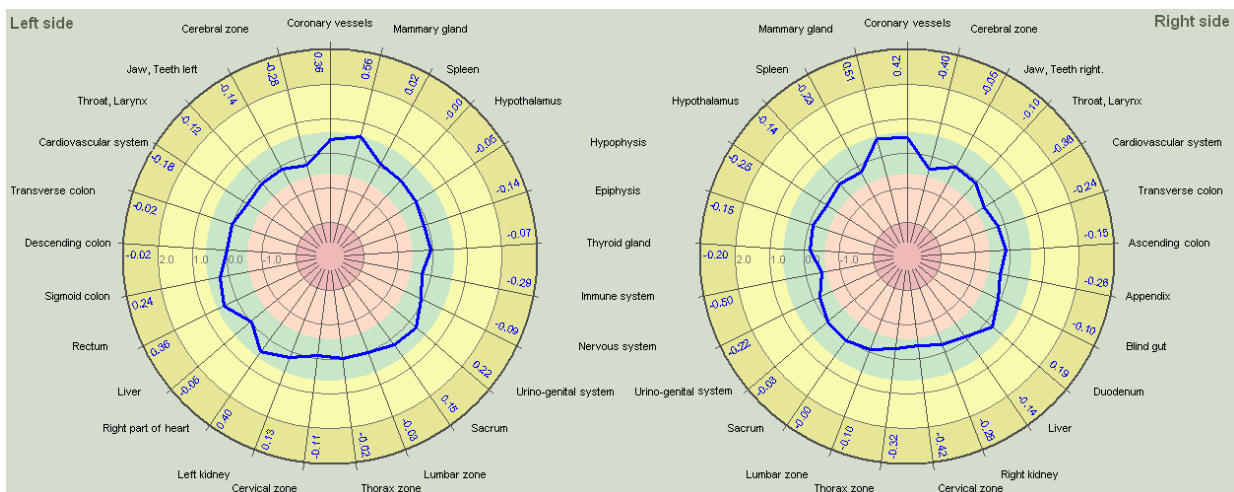

Figure 2: Diagnostic chart of AB, who has undergone health-promotion regularly using comprehensive digital medicine or “digital homeopathy”, for one and a half decade.

RESULTS

Based on experience of the persons who are utilizing the optimal combination (as explained below) of side-effect free comprehensive digital medicine or digital

homeopathy and evolved homeopathy medicines for preventing problems of various organs and systems to achieve near zero disease-levels, it is clear that the methodology of comprehensive digital medicine or digital homeopathy medicine for health promotion is very

effective. It can also be felt that the effect of comprehensive digital medicine or digital homeopathy medicine is quicker and good in improving the conditions of various organs as well as immune, endocrine and nervous systems simultaneously, that are near even to the bud stage.

Case history 1

This case history relates to Figures 1 and 2, which are the diagnostic charts of AB, who has undergone health-promotion using comprehensive digital medicine or “digital homeopathy” medicine for prevention and cure, for one and a half decade regularly.^{1,2}

From his experience, AB feels that there has been about 20 years age reduction along with improvement of physical and mental stamina, because of regularly using the optimal combination of side-effect free comprehensive digital medicine or digital homeopathy and evolved homeopathy medicines, along with GDV check-up for several years.

DISCUSSION

Digital homeopathy is a system of comprehensive digital medicine that is useful for health promotion by curing diseases of not only the various organs, but also the immune, endocrine and nervous systems, even at the bud stage, for the entire humankind. Hence, for persons who are regularly taking comprehensive digital medicine or digital homeopathy medicine starting from childhood (say, from the age of five years), will have their all organs and systems so perfected that their bodies are unlikely to grow tumors.

In view of the great efficacy of comprehensive digital medicine or digital homeopathy, when the condition of near zero disease-levels in various organs and the immune, endocrine and nervous systems, of human body, is achieved, about 20 years age-reduction is felt, physical and mental stamina improves, with increase in longevity.

Health promotion methodology utilizing an optimal combination (as explained below) of the side-effect free preventive and curative medicines of comprehensive digital medicine or digital homeopathy and evolved homeopathy, is very useful for any person to achieve and maintain near zero disease-levels in the various organs and systems. Alternatively, if for all person's comprehensive digital medicine or digital homeopathy medicine is generated daily, then it will be too costly, tedious, time-consuming, and hence impractical.

If any person is able to maintain a totally tension-free lifestyle, then that person will be able to avoid preventive medicines of evolved homeopathy and continue with only monthly generation of comprehensive digital medicine or digital homeopathy medicine and its regular consumption. But, it is impossible to maintain a totally tension-free

lifestyle in today's world, due to the COVID era, and particularly due to the structure of human mind.

It is noteworthy to mention that 90% of human mind is the subconscious mind (which never sleeps unlike the conscious mind), whereas, 10% of human mind is the conscious mind.¹⁸ So, any tension (*viz.*, anxiety, irritability and anger) that occurs in our conscious mind keeps repeating day and night in our subconscious mind without our conscious awareness, and continues accumulating its harmful effects, and generating toxins. As explained in a previously published paper, the effect of a mild episode of anger caused angina pectoris in a patient's heart, 36 hours after that episode, when based on his primary/ exciting cause, Nux vom. 2x, was given, which eliminated the pain, and stopped progression of angina.¹ Generation of comprehensive digital medicine or digital homeopathy medicine about a month ago, cannot take care of the effect of such newly generated and amplified (in the subconscious mind) mental symptoms; whereas, the preventive daily doses of evolved homeopathy can nip them in the bud stage. Fig. 2 of that paper showed a small peak for the angina disease level (0.07, as he was under comprehensive digital medicine or digital homeopathy medicine treatment scheme for quite some time) in the cardiovascular system.

Hence, the regular preventive doses of evolved homeopathy are useful along with the regular dose of comprehensive digital medicine or digital homeopathy medicine, for persons who are not able to maintain a tension-free lifestyle.

In 2020, global spending on health reached US\$ 9 trillion, or 10.8% of global gross domestic product (GDP).¹⁹ Even if a fraction of it is spent for the 8 billion people of the world for providing the side-effect free comprehensive digital medicine for all under the auspices of UN, WHO and World Bank/ IMF, diseases can be avoided, and longer living healthy people can increase the GDP further. It is expected that in a span of a few years, global GDP can increase by 5% over a year (in contrast with the present 3%, due to the improvement of physical and mental stamina of the people, and because people will work for more number of years before retirement.²⁰ But, the largest counter force against such achievement will be the lack of health-consciousness among vast majority of the humankind. Hence, the global organizations will have to work coherently; and, even the insurance companies will have to join this effort by reducing the insurance premiums, for those persons who are covered by such comprehensive digital medicine or digital homeopathy medicine prevention schemes.

To begin with the comprehensive digital medicine prevention schemes, the global organizations will have to provide for the first few years (after that it will get funded from a part of the increase in global GDP) fund and offer suitable incentives (may be, appropriate annual cash incentives after remaining under coverage of

comprehensive digital medicine prevention scheme), since vast majority of the apparently healthy part of humankind (whose GDV Diagnostic chart will be like that of Figure 1 of AB, whose immune system disease levels are at 0.83 and 0.79) believe that they're healthy, as they are not perceiving any symptom, although all of their organs are having a disease level between 0.8 to 1.0 (like that of Figure 1 of AB), and such disease level in immune system cannot prevent tumors/cancer and many other severe diseases.

Gain of the humankind covered by such comprehensive digital medicine or digital homeopathy prevention schemes, will be a healthy, happier, optimistic, and longer life as well as higher earnings during their working life; additionally, they will be able to prevent occurrence of tumor and cancer, in their bodies.

Any interested computer-literate person anywhere in the world, can utilize this simple to use but sophisticated GDV diagnostic device for generating comprehensive digital medicine for anybody, by feeding an electromagnetic-signal from this device to the medicine-preparation-device, involving very low cost.

CONCLUSION

In view of the above, it can be said that digital homeopathy is the comprehensive digital medicine that leads to health promotion by curing diseases of not only the various organs, but also the immune, endocrine and nervous systems, even at the bud stage. Hence, for persons who are regularly taking the comprehensive digital medicine starting from childhood (say, from the age of five years), will have their all organs and systems so perfected that their bodies are unlikely to grow tumors. However, for persons who have started doing health promotion using comprehensive digital medicine or digital homeopathy medicine at a later part of their life, each of the following preventive medicines need to be taken once a week, at the rate of one medicine on each day: acid Nit. 3x; Calc. Phos 3x; Conium Mac. 6x; Hydrastis Canadensis. 3x; Kreosotum.3x; Ruta Gr. 3x; and Thuja Occ 3x. It is important to mention that doses of these medicines should always be taken, keeping 20 minutes gap (from any consumption of food or drinks), before and after the medicine doses. Health promotion methodology of side-effect free comprehensive digital medicine is very beneficial for any person. When the condition of near zero disease-levels in various organs and the immune, endocrine and nervous systems, of human body, is achieved, about 20 years age-reduction is felt, physical and mental stamina improves, with increase in longevity.

ACKNOWLEDGEMENTS

The authors thankfully acknowledge that their more than a decade long work for the development of Homeopathic preventive and curative medicines for Health promotion, rests on the foundation of the principle of "Advanced-

Homeopathy" developed over a few generations by Dr. P. Banerji, et al, of Prasanta Banerji Homeopathic Research Foundation (PBHRF), Calcutta.
